

Think your old  
laptops are harmless?

**Think again.**

DIGITAL GUIDANCE

**They could be hiding  
your company's**

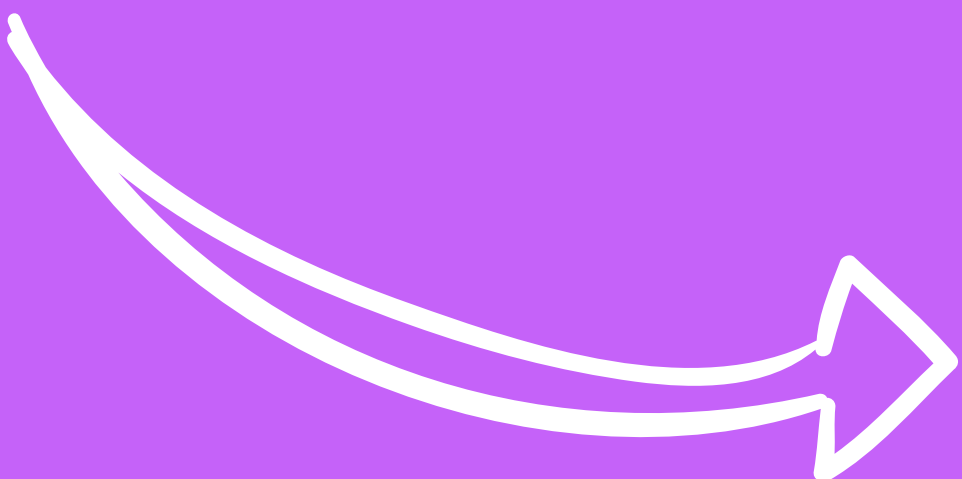

**biggest  
security  
risk.**

DIGITAL GUIDANCE

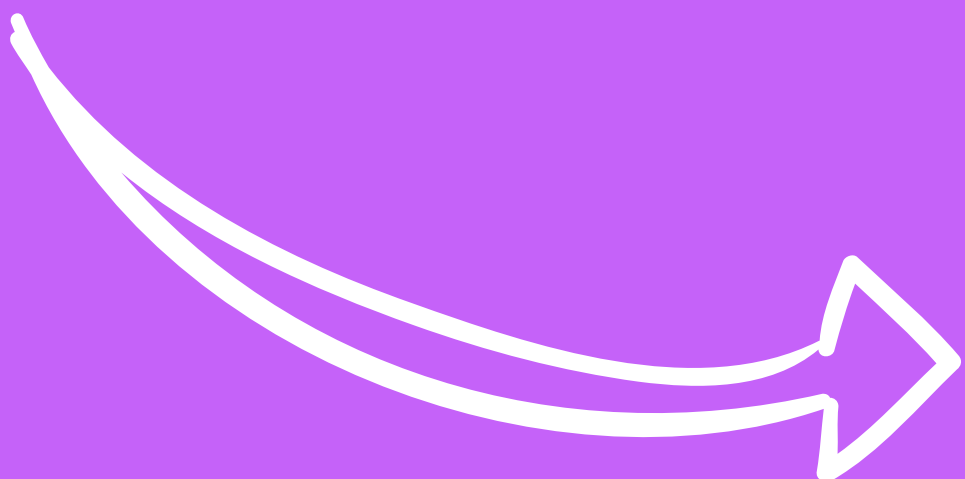

# Even dusty old devices **can still hold:**

- ✕ **Customer data**
- ✕ **Saved passwords**
- ✕ **Access to cloud systems**
- ✕ **Sensitive emails**
- ✕ **Private documents**

**And guess what?**

***“Deleting files”  
doesn’t actually  
delete them.***

DIGITAL GUIDANCE

**It's more like hiding  
the files in the attic.**

They're out of sight,  
but still there for  
anyone who knows  
where to look.

DIGITAL GUIDANCE

**And hackers  
know *EXACTLY*  
where to look.**

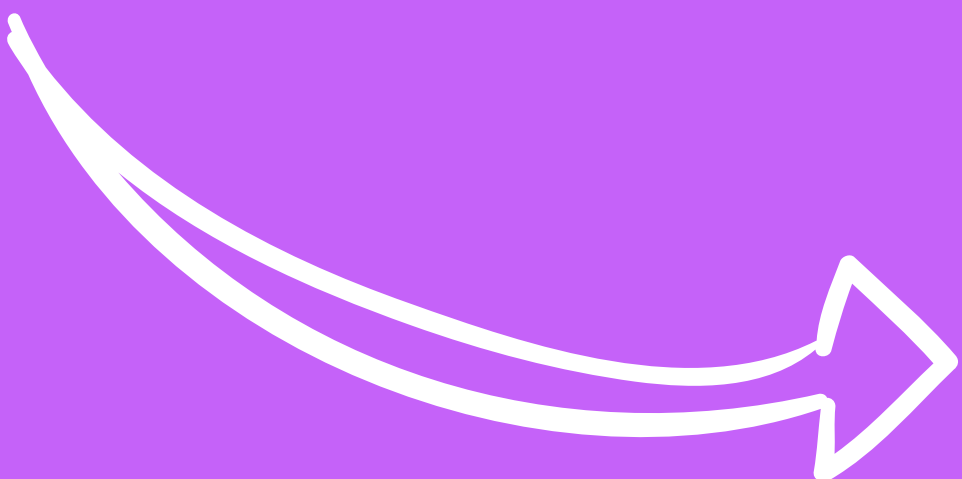

They can recover  
deleted data in  
minutes.

DIGITAL GUIDANCE

If an old laptop gets sold, trashed, or recycled without being wiped, **you could be handing over:**

- ✕ **Client lists**
- ✕ **Pricing info**
- ✕ **Logins**
- ✕ **Emails**

**That means:**

 **Data breaches**

 **Fines**

 **Embarrassment**

 **Lost trust**

**Make sure to...**

**Back up what  
you need**

**Use proper data-  
wiping software (or  
ask your IT support  
partner)**

**Always get proof  
of secure disposal**

DIGITAL GUIDANCE

**Don't let forgotten  
laptops put your  
business  
at risk.**

DIGITAL GUIDANCE

# We can help

you ***SECURELY***  
wipe and retire  
your old tech...

DIGITAL GUIDANCE

...before someone else  
finds what's hiding on  
it.

**Get in touch.**
