EDITORIAL

Something new has been added to our rapidly growing Institute. You'll find them in 8 locations around campus. What are they? As of now, there is no actual heart-stopping name for them; however unless you are in the habit of walking around N.A.I.T. with your eyes closed you should have no problem in seeing them. They are the BLUE BOXES"

The boxes are hanging on the wall for a reason and that reason isn't for the disposal of garbage (as students in the science wing think); and it isn't a wishing well as some other students may think. They are there to help improve communications throughout the school. Something which needs a great deal of improvement.

The "Publication of Activities Form" which is located at each box (that is unless some imbecile has carefully ripped them into 5,000 pieces) is really quite easy to fill out. Once you place the proper form the box your event, activity, ad, or ideal will go to the NUGGET, N.A.I.T. RADIO, N.A.I.T. T.V., and/or the PHOTO DIRECTORATE and YEAR BOOK if need be, to receive all the publicity you'll need. If all technologies will get into the habit of using these forms, and we can keep those "lower-forms" of students who inhabit the Institute to put their garbage in the proper places, a great improvement in inter-technology communication will occur.

LETTER TO THE EDITOR:

NDP: BUILDING ON IGNORANCE

Recent editions of the newspaper printed by the New Democratic party youth have prompted this writer to question their goals or at least the tactics they utilize in attaining these goals. It appears that the NDP find it necessary to build their campaigns on slanted statements and innuendos. To qualify the foregoing, printed below are statements taken from the August/September 1968 issue of "CONFRONTATIONS", the voice of the NDY.

"University and senior-matriculation high school students are trained to believe they are members of a special elite. These students comprise only 9% of all youths 18-24 years of age in Canada. They are trained to believe they are superior to the other 91% and that it doesn't really matter if they take jobs away from workers now. They will be controlling those jobs in the future anyway."

I take exception to the first two sentences. Where, pray tell - does this neo-Nazi training take place? As far as I can analyze these sentences, I assume that because the NDP party is supposedly a workers' party it must take to task the higher class elements of society, blaming them for anything and everything and maintaining the image of inferiority of the working class by slanting facts and figures to suit their own personal goals.

This next statement is a real dilly. It's taken from an article on Trudeau, and it's the sub-heading to a rather lengthy article.

"No one can deny that Pierre Elliot Trudeau is an extraordinary man. As far back as 1933, when Canada was suffering through the Depression, the 13-year old Trudeau found a special way to spend his time. He took a vacation in Venice, Italy, along with other members of his family.

Pure unadulterated, filthy innuendos! If this is what is going to further the cause of socialism

or equality within this country, philosophy. Socialization of Canada then the NDP party is nurturing a seems inevitable but pray to God freak within the womb of political it is not the NDP who oversee it.

SERVICE FROM A BROOM CLOSET

On the main floor in the tower building is a door marked T110. Inside is a grey phone, number 263. This is the Health Services Office. If you can squeeze into the crowded cubbyhole you will probably find two nurses and a nurse's-aide being run off their feet. They are bandaging cuts, issuing pills for headaches and stomachs, curing colds, calling doctors, taking temperatures, ice-packing sprains, and giving immunization shots for small-pox, typhoid, tetanus, polio, and diphtheria. Health Services is designed to maintain and improve the health of employees and students - and they will - providing you have an appointment. The appointment system is great for the nurses, it has reduced monthly attendance from 761 in January to 448 in February.

The staff includes:

Mrs. D. Smith, a well-qualified public health nurse who is responsible for the operation and administration of the health services. Mrs. G. Schweitzer, the registered nurse who is responsible for minor treatment and emergency first-aid services.

Miss. A.J. Franko, a nurse's aide-stenographer who acts as a receptionist as well as a nursing assistant.

These nurses are under the jurisdiction of Dr. Rose, the Deputy Minister of Health; during the 1966-67 school term these nurses helped 8,437 people.

T110 is open Monday through Friday from 8:15 A.M. to 3:45 P.M. A First-Aid attendant is on duty Monday through Thursday 7:00 P.M. to 10:00 P.M. for the duration of evening courses.

This year certain changes have been made to lighten the nurses' load somewhat, but it fails to meet the students' need for increased services, treatment, and consultation. TB skin tests for all persons studying or working at N.A.I.T. will be required within three months of registration or employment.

Starting in September, 1968 the data centre at N.A.I.T. will assist by:

1. Coding information from Medical History Questionnaires by reproducing it on routine health records, which will be kept confidential in the Health Service Office
2. Coding and analyzing pertinent information and compiling statistical tables.

But all is not well with Health Services - they too have their problems. For instance their so-called "office" resembles a broom closet in size.

"THE NEED MORE ROOM"

They would also like a doctor on full staff and a full time stenographer to relieve the nurse's aide. Hopefully they would like to see someone on duty at all times.

Despite inadequate staff and cramped quarters the nurses in Health Services are doing a good job and deserve a pat on the back.

CHAPLAINCY CORNER

First in Series
by Rev. Hart Cantelon

Why is a chaplain on campus? Because his presence means you and I must face three basic questions. These are:

1. Who are you?
2. What do you cost?
3. Where are you going?

Who are you? You may answer "Homo-Sapiens, five foot two--- eyes of blue", or, "a sweet blone, 36-24-32." The chemistry department might say "you are \$3.95 worth of potassium, calcium, carbon, etc.. Yet those of you who are married and have a little girl of 2, or a little boy of 5 would never trade them off for any of these answers. Thus the very presence of the chaplain requires you and me to go deeper for the answer. To go so deep as to come to the conviction that you are a Child of God is all that such a phrase means. Out of this concept comes the ideas of individual worth, acceptance, love, hope, dreams, and vision for the tomorrows that face you and me.

What do you cost? How many times in my counselling with young people, I have heard them declare "This is my life!" Don't kid yourself. That coat you wear: 168

hands have touched it, and you likely can't even name the man who sold it to you. 38 hands have touched that lunch you carry. 96 people have played some part in the making of the car you drive to class. It takes over a thousand individuals and thousands of books to produce that teacher in front of your class. So don't tell the world "This is my life!" From the time your mother carried you in her womb to the time someone carries your body to its grave, you cost somebody something every moment of your life. And most of all you cost Somebody a Cross on a hill. Don't you forget it.

Where are you going? What is your life to be like five, ten, twenty years from now? What is the direction you're facing? You'll make money! Sure. Anybody with a faithful daily effort and an ounce of reliability can make money. But what other goals do you have and how have you set out to reach them?

These are the questions that confront you through the presence of your chaplain, and what is more he is ready, willing and able to help you answer them. See him soon.

RACE RELATIONS IS SUBJECT OF EVANGELIST SPEECH

Ralph S. Bell spoke to a standing-room-only crowd of interested students and staff members in N.A.I.T.'s Little Theatre last Wednesday noon.

Rev. Bell, a Negro, born in St. Catharines, Ontario, and now living in Los Angeles, travels widely on speaking engagements. Extra activities include a professorship at the Los Angeles Bible Training School, and the chaplaincy of the Los Angeles County Jail.

A university graduate, Mr. Bell, 33, traced the history of race relations from the slave-trade days of 300 years ago to the present.

"It is not a Negro problem, but a white problem," he said. In Harlem, New York, over 1,000,000 Negroes are crowded into a 1-by-2 1/2 mile area. From the crime robbery, overcrowding, poverty and drug addiction in areas such as this emerges the black power movement of today," he said.

Mr. Bell said that government laws and regulations would never fully solve the unfortunate racial situation. He added that a change of attitudes and beliefs resulting from a conversion experience with Jesus Christ is the answer to the

problem.

Several NAIT students asked Several NAIT students asked questions which Mr. Bell answered to the audience.

Solist Homer James sang two solos at the same meeting and Bill Fasig accompanied him on the piano. Both Mr. James and Mr. Fasig are widely travelled and experienced musicians.

NAIT's Chaplaincy Services sponsored the meeting. The five chaplains hope to sponsor further inter-faith meetings in the future. The chaplains encourage all students and staff to offer suggestions concerning future efforts. A chaplain is present everyday from 11 a.m. to 1 p.m. in room E101D.

The chaplains invite all students to make appointments in person, or through the Student Counselling Services (T112, 158 grey phone).

The days present and respective denominations are as follows:

Monday - Rev. Litman - Baptist
Tuesday - Father Stein - Roman Catholic
Wednesday - Rev. Cantelon - United
Thursday - Rev. Kaminski - Lutheran
Friday - Rev. Flager - Anglican.

THE STUDENTS UNION EXECUTIVE WORKING FOR YOU

The perennial parking problem shared the spotlight with Frosh week activities at the Student Council Meeting of Sept. 18. Reports from the executive revealed that the Frosh Shinerama went over the top with a \$2503.39 haul. Only one hundred and fourteen freshmen turned out for the affair, but excellent publicity, provided by Radio & TV stations & the Journal, and the zeal of the freshman made it a success.

The first part of the meeting involved executive talking and council listening, but halfway through, it erupted with the announcement that three hundred tickets for illegal parking were awarded to the unfortunates parked in the Menorah Curling Club parking lot. Mr. Saunders' office took care of the fines and the delinquents were let off with a warning, but second offenders will be punished.

Hans Schneider of Architecture challenged the setup of Frosh week and the barbecue and dance. He claimed that they were held too early, pointing out that most of the second year students hadn't registered yet. Kevin Pratt, NAITSA Social Chairman, explained the system of NAITSA planning social activities the spring before.

The various responsibilities of

the different clubs of NAIT were outlined, such as returning a list of club officers and copy of the club constitution to Mr. Meadus.

Except for the occasional outburst concerning parking tickets, and the Frosh activities, the council meeting was fairly routine. But then again, the council is only as good as the interest the students take in it. Attendance was only 50%. This should and better increase at future meetings.

NAIT AMATEUR RADIO CLUB

V E 6 M R

Organization meeting at 12:20 p.m. Wed. Oct. 2
In the Ham Shack, H-200.

An amateur license is not necessary.

All interested persons are urged to attend.

COUNCIL MEETING

WEDNESDAY
OCT. 2, 1968

IN RM. E-126

TIME: 5:15 P.M.

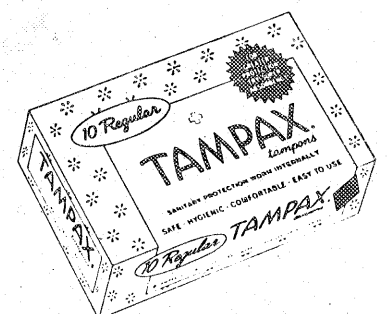

Council meetings will be held every second Wednesday. Remember that it was passed by council that if a club representative is absent from two consecutive meetings, that club will automatically lose its voice in N.A.I.T.S.A.'s affairs.

The Best Things Happen

When You Least Expect Them

Wonderful things that can happen to you... any day! With Tampax tampons there's no such thing as "off days." You are cool, comfortable and poised every day. Because Tampax tampons are the modern sanitary protection developed by a doctor for all women—married or single. They're made of pure white surgical cotton and worn internally—nothing need show. There's never any chafing or odor. Never any pins, pads or belts to spoil the fit of your clothes. And Tampax tampons are completely disposable. The silken-smooth applicator—and tampon too—can be flushed right away. Why don't you try Tampax tampons? Month after month without inconvenience. It's one of the best things that could happen to you.

NAIT SUCCEEDS IN FIRST SHINERAMA ATTEMPT

by H.G.

Poor but great - that's the whole story. Approximately 294 names of FROSH were signed up as expected participants in SHINERAMA '68 on Saturday, September 14 but only 114 people showed up Saturday morning.

The morning started as planned with people arriving, then confusion plus one took over. The first arrivals were checked off, supplied, and sent out on an ETS bus to the downtown area. Then trouble began - WE RAN OUT OF PEOPLE for the rest of Edmonton. SOLUTION - PICK up some people from downtown area and re-distribute to various shopping centres.

This was the way the morning was spent, with distributing and re-distributing until conditions were balanced. Then the supplying problem came to hand. Thanks to the help of a few seniors who volunteered their time, we managed to keep the shiners supplied with sandwiches, pop, polish and miscellaneous.

At 4:30 PM confusion resulted again, the collection of FROSH this time, but this was not too serious and everybody arrived home safely. The money was taken to the bank and counted by the Banking Students of NAIT with the results being \$2503.39.

We succeeded in reaching our goal, with JUST 114 people. To them and to the few seniors who helped out I would like to extend the thanks and appreciation on behalf of the SHINERAMA committee, Bob Clegg (chapter president), and the many children that are now suffering from CYSTIC FIBROSIS, and hope that next year more frosh will take part and raise more money for research so that fewer children suffer.

Also, following this article, is a letter received from Mr. Saunders extending his congratulations to the people who organized and frosh who participated.

Again, may I express my thanks and appreciation to the frosh and seniors who helped make this possible.

Mr. Percy Wickman
Vice President
N.A.I.T.S.A.
EDMONTON, Alberta
Dear Percy:

May I extend my sincere congratulations to you, Bob Cochrane, Harvey Gellert and to all the participants in the Shinerama.

I understand the students collected in excess of \$2,500.00, which was above the quota. Since this was the first year of the venture I believe you are all to be congratulated on the manner in which you conducted this campaign. It was well organized, well advertised and a most worthwhile project.

To me this gives greater emphasis to my claim that NAIT students are a hard working, hard playing, responsible, but different group. Again, congratulations.

Yours sincerely,

W.A.B. SAUNDERS, P. Eng.
Principal
WABS: rmp

cc: Steve Dillenbeck, President

PROUD GIRLS ACCEPTING FIRST 'MILES TROPHY'

MEDICAL RECORDS

WINNERS OF LAST YEARS MILES FOR MILLIONS TROPHY

Did you know:

- that Edmonton raised over \$326,000 in last year's walk
- that Edmonton came second, next to Ottawa, in raising the largest amount of money in Canada
- that over 24,000 walkers entered
- that over 12,000 walkers completed the 25 miles
- that NAIT raised approximately \$6,000
- that NAIT entered approximately 600 walkers
- that NAIT had out the largest individual group
- that Electronics raised over \$600
- that Ken Deleff wheeled 5 miles at over \$40 a mile
- that Sharon Kitz (Miss NAIT) finished in bare feet
- that AVT walked hand-in-hand with NAIT
- that next year the walk may increase to 30 miles
- that next year NAIT will raise even more money

On behalf of the Students' Association I thank you for your contribution in adding to the success of NAIT's participation in the walk.

PERCY WICKMAN
VICE-PRESIDENT, NAITSA '68 - '69

APATHY AT NAIT

D.C. COPEMAN

Some of the things we need even less than apathy are sermons denouncing it. These usually tell us of our duty to help the school, or club, or whatever. This approach ignores an important fact about people. We are selfish. We tend to work much harder for ourselves than for others.

NAIT clubs and activities need people to help with projects. But what's in it for us? There are many newcomers to Edmonton at NAIT this fall. What better way is there to get to know people than by working with them? Such activities will provide a relaxing break from studying, or K-winging, or whatever you do after classes. Apart from the friendship gained, extra-curricular activities will give you the chance to learn how to work more effectively with others. You will have opportunities to express your opinion on projects or improvements. Defending these will let you use some of the theory that your English instructor delights and handing out.

It's not hard to think of all sorts of advantages you can gain by getting involved. And you know something? It can be a lot of fun.

WE REPEAT THERE IS'NT A PARKING PROBLEM AT NAIT

After parking on the Menorah area for several years, NAIT students suddenly found that they were contravening City By-laws. According to these By-laws, it is unlawful to park on a boulevard, or on City property designated as recreation area or public park.

Approximately seventy tickets were written out for these offences. (The police-man I talked to admitted to writer's cramp, and said he was glad he had only three tickets left in his book.)

Because the tickets were issued without warning, City Hall agreed to cancel them after student voices rose in protest. Mr. Saunders help-

ed cut a great deal of red tape and confusion by collecting the tickets in his office and sending them to City Hall himself.

One good thing out of the chaos - the new parking area bounded by Princess Elizabeth Avenue and 107th Street was opened more quickly than it might have been. And it's more convenient to the K-wing.

Evidently, the Menorah area will be available for parking as soon as markers are put up to indicate the boulevard area.

By the way, where did you park

& T.V. Arts student, respectively.

The club's officers have definite goals in mind for this season. Competent News and Sports Directors will organize efficient departments for immediate gathering and dispersal of the news. These bureaus will cover sports and extra-curricular activities in and around NAIT. They will be assisted by regular announcers who will do this in addition to their other duties of making commercial announcements, interviewing, and hosting various programs. These programs will include live productions films, and current affairs programs.

As the production of T.V. program requires finances, a tentative budget to be presented to NAITSA was voted and agreed upon. A club constitution is also to be agreed on and proposed to NAITSA.

In the opinion of the club's first executive, this should be an extremely successful year for NAIT T.V. and a rewarding one for their viewers.

this morning?

NAIT T.V. ORGANIZED

Approximately forty people attended the organizational meeting of the NAIT T.V. Club on Thursday, September 19. The newly formed club (previously NAIT T.V. was not a bone fide club - merely a group of people interested in the aspects of broadcasting) was organized to facilitate better and more comprehensive programming for NAIT.

First on the club's agenda was the election of officers for the year. Jim Grant, a second year Radio & Television Arts student, was elected club president. Jim, a top student, has experience with both CFRN and CBXT, and with NAIT Radio and T.V. Vice President Mike Morrison, is a second year Electronics student who has also worked with NAIT T.V. and Radio. The technical director for the station is David Youle, is in his third year of electronics. Dave has worked with CFRN. Production has worked with CFRN. Production manager Bill Siebert and Secretary-Treasurer Beth Brunen are second year Electronics and Radio

CAMPUS HAPPENING

A WOMAN WALKING HER DOG

Yes, there was a woman doing just that (or should I say it had the appearance of a woman). This was one of the events of the 1968 frosh week. The week started slow, but picked up on Wednesday when an enthusiastic supporter of frosh week dressed up as a woman (supposedly). I would like to congratulate him on his efforts to keep the frosh spirit alive.

On Friday, between 11:00 PM and 1:00 PM the annual Kangaroo Court was held, with pies in the face, kissing fish, among the many gags. One of the exciting moments happened when a group of frosh from Civil Technology decided on a plan to overrule the court. They jumped on the stage and started throwing pies at the court officials. Maybe someone should have mentioned to them that this is the way many school events are cancelled, and this part of the plan is not too humorous.

The same evening the wind up dance to frosh week took place in

the NAIT gymnasium, ending up with a packed house. It started at 8:15 P.M. with the OBVIOUS playing for the first half. Attendance took over at the other end of the gym to give the PRIVILEGE time to set up. The PRIVILEGE arrived late and only played a couple songs before 10:30 PM when the Miss Freshette candidates were introduced by Kevin Pratt (Soc. Chairman). The winner, Miss Linda Holmes, from Respiratory technology, running for Distributive technology, was then crowned Miss Freshette of NAIT.

At 10:45 PM the PRIVILEGE started playing again only to be stopped again this time due to power failure. At 11:00 PM everything was well again, with the PRIVELEGE finally playing for an hour. THE music was loud but good. Everything was then shut down at midnight with a lot of happy people (of course, some have no bad habits).

A SOCK-HOP HAPPENING

Thursday, September 19th's noon hour featured a different kind of sock hop, than the usual run of the mill sock hop. It was sponsored by the Electronics Technology, and as could be surmized by the attendance of approximately 300 students, it was free. The INTERNATIONAL DATELINE was not a well known band, but their music was magnetic, or weird enough, to draw the crowds. The sock hop was in aid of the Electronics Technology's CAKE BAKE, or should I say social function which was held on Friday, September 20. Participation in the sport of dancing was practically nil, but that is to be expected as witnessed in past N.A.I.T. sock hops. It seemed, however, that those who joined in the sport, enjoyed themselves and the music, immensely.

The musicians themselves, and I talked to all of them, were very friendly and open minded about their music. The EVEN ADMITTED that they would rather play nothing but underground music, but because music is a commercial trend these days, they follow the pattern. While the INTERNATIONAL DATELINE were on stage, some individuals found their act somewhat vulgar and distasteful. I suppose it was up to the individual to decide, but for myself, it was one of the more enjoyable sock hops that I have attended. This band, although their tactics were crude, had the ability to make the audience laugh and join in. This is a rare talent which I have not witnessed at most other noon hour dances.

On the whole, I feel the sock hop was a success, even though the boys from Electronics Technology may not think so. It appeared that not one ticket was sold at the dance. Kind of disheartening - EH FELLOWS.

Between jokes and music, the time went by with as much cornballing as could possibly have been

shoved into 100 minutes (usual length is 120 minutes). But when it was all over, the only one that I could see, without a smile on his face, was the JANITOR, AH WELL, a (wo) mans work is never done!

THE ELECTRONICS CLUB REPORT

The Electronics Club welcomes back all previous members and would like to extend a special welcome to all frosh. As usual the club will be entering many sporting and other intramural activities this year and we would like to encourage all members to come out and take part in these activities.

The first general meeting of the club was held on the seventeenth of this month in the little theatre and I regret to say there was still standing room left. However, the meeting proved very lively as some motions were proposed that involved, indirectly, club policy. One of these, a motion to change the club jacket to a nylon shell was soundly defeated although not without a long discussion. During the discussion the President pointed out that the club had built a reputation on these jackets and he felt we should maintain this "grubby" image.

This year for the first time the Electronics Club was asked by the UCF campaign to distribute their posters. We would like to thank our members who turned out to help us distribute these.

The first of many "violent uprisings" occurred the night of September at the Silver Slipper Saloon. As always the party was a huge success, don't miss the next one.

One question I would like to raise is why was frosh week so early this year? Having frosh week one week later would have allowed many technologies to plan much more for their frosh. NAITSA you blew it!

LINDA HOLMES, from RESPIRATORY TECHNOLOGY, seems to be a born winner and I am sure will do NAIT proud in the up-coming MISS ESKIMO PAGEANT" Linda, who was born in Wetaskiwin, now resides in Edmonton. She came to NAIT from Scona High School. When Linda leaves us she will travel all the way to our poor cousins in the south and become an Inhalation Therapist at The Calgary General Hospital. From all of NAIT -----GOOD LUCK in all your future endeavors, Linda.

ATTENTION TECHNOLOGIES

Do you have troubles locating a band for a party or dance? We have solved this problem through the operation of our newly formed Public Relations Department.

I have collected the names of international acts self-contained groups, vocalists, bands, jazz, folk and folk rock, and local groups from Spane International and Armoux Agencies.

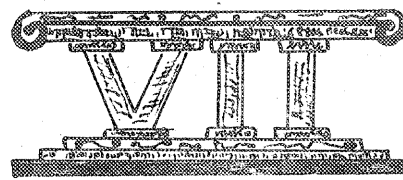

These groups are at your disposal. Just see HARVEY GELLERT or LARRY BUSH from the NUGGET office where you can choose a band from our listing.

In the future, I will try to recruit more bands, not mentioned in this listing, for your use.

Also, I will be starting a new column in the NUGGET titled IT'S HAPPENING, which will contain information about dance dates, and social events coming up plus past sock-hops and dances held.

ARE WE READY FOR THIS ???

Don't be surprised if, by the year 200, your garbage is picked up by a robot, or even your housework done by one. Because by the turn of the century, 60% of the jobs we are training for today in this institution will be either obsolete or changed beyond recognition. Children born now will be working at jobs not yet created. And although our average work year will dwindle to 600 hours compared to today's 2000, we'll have to spend at least a third of our lives learning how to function in the supersociety of tomorrow.

Today's inadequate and antiquated educational system will undertake to prepare 63,000,000 students for life. In an educational system making preparations from a facilities standpoint instead of one based on changing conditions, it is easy to see that schools being built now will be obsolete by elec-

tronic and social change within twenty-five years.

However, perhaps the educational problems may not be as bad as all that. Scientists are predicting a generation of geniuses. By the year 2010, a variety of drugs will be available to permanently raise everyone's level of intelligence. One lab is pioneering a drug which increases the brains RNA production by 35-40% and improves the thinking, memory and alertness of elderly people. The performance of animals will be raised so that they can perform low-grade physical labour. Learning will be transmitted from one person to another via artificial virus.

And if this tampering with human subjects by science isn't enough, genetics is taking vast strides into the future. Height, weight, hair, physique, mental and physical ability can be determined by computer

analysis of chromosomal patterns and will eventually be controlled. Soon we'll be able to produce geniuses and star hockey players at will. The time-honoured science fiction theme of creation of life in the laboratory will come true within twenty years - it will be feasible to fertilize human eggs in the lab, develop them as embryos, and later transplant them to a mother's womb. By 1985 we will be able to create primitive life forms.

President John Kennedy's goal of a man on the moon by 1970 will be matched by orbital stations at the same time. Five years later a temporary lunar base will be set up. Lunar materials will be transported to earth. In the 1980's, a Mars landing will take place. Permanent research stations on nearby planets will be installed by the '90's. And in 2025 regularly scheduled commercial

traffic will fly back and forth to the lunar colonies.

Down here by that time, we'll still be getting around in much the same way. It's predicted that by then, there will be a car for every twenty feet of highway. But coast-to-coast flights will only take two hours. Encouraging?

Perhaps the most startling of all will be the Huxleyan changes in politics. There seems to be no direction to go in but socialism and centralized government. The old-style campaigning, kissing babies (not always of infantile variety) and handshaking will be a thing of the past. The death of traditional politicking will come with the automated voting devices. By 1975, a chemical will be developed to destroy the will to resist. With that, Big Brother can easily become a reality.

This sketchy outline only touches on the astronomical changes

about to take place before this century is over. But the problem of just how they will affect us is quite another thing. Centuries upon centuries of conditioned thinking will have to be completely forgotten in order to accept the new standards, morals and conditions thrust upon us by change. We will have to learn how to constructively occupy our time when we're not at work. We'll have to learn how to live with near-perfect people - ones endowed with intelligence, looks and abilities far beyond the standards of today. The time-honoured concepts of competition, individualism and the sanctity of work will have to be abandoned. We'll have to learn how to live with all this change within our own lifetimes. Can we?

Sue Taylor.

TEN COMMANDMENTS OF ELECTRONICS

1. Beware of the lightning that lurketh in an undischarged capacitor, lest it cause thee to be bounced upon thy buttocks in a most ungentlemanly manner.
2. Cause thou the switch that supplies large quantities of juice to be opened and thusly tagged, so thy days may be long on this earthly vale of tears.
3. Prove to thyself that all circuits that radiateth and upon which thou worketh are grounded, lest they lift thee to high-frequency potential and cause thee to radiate also.
4. Take care thou useth the proper method when thou taketh the measure of high-voltage circuits so that thou doth not incinerate both thee and the meter; for verily, though thou has no account number and can easily be replaced, the meter doth have one, and, as a consequence, bringeth much woe unto the Supply Department.
5. Tarry thou not amongst those who engage in intentional shocks, for they are surely nonbelievers and are not long for this world.
6. Take care thou tampereth not with interlocks and safety devices, for this will incur the wrath of they seniors and bringeth the fury of the safety officer down about thy head and shoulders.
7. Work thou not on energized equipment, for if thou doeth, thy buddies will surely be buying beef for thy widow and consoling her in other ways not generally acceptable to thee.
8. Verily, I say unto thee, never service high-voltage equipment alone, for electric cooking is a slothful process and thou might sizzle in thine fat for hours on end before thy Maker sees fit to end thy misery and drag thee into His fold.
9. Trifle thou not with radioactive tubes and substances, lest thou commence to glow in the dark like a lightning bug, and thy wife be frustrated nightly and have no further use for thee except thy wage.
10. Commit thou to memory the works of the prophets, which are written in the instruction books, which giveth the straight dope and which consoleth thee, and thou cannot make mistakes.

A DASTARDLY TALES OF NORTHERN ADVENTURES

As I sit with pen in hand, my mind wanders to memories of long ago. For all these years I have kept these memories to myself, but I now feel that the human race has advanced far enough to grasp the full meaning of the tale which I am about to tell.

Believe me when I tell you that this story is factual in every detail. It is the truth as sure as my name is Thadeus T. Witherbloom.

It began one day in the dense forests of Northern Alberta. My companion and I ventured into this forbidden territory in the anticipation of bagging a northern grizzly. We had fought the elements for almost a full day, and were in the midst of a fierce battle with mosquitoes, when my companion

heard the trumpeting of a bull moose. We were standing in the middle of a rather large clearing at the time, and my companion quickly scrambled to the top of a nearby tree.

"Thadeus!" he screamed. "The bull is charging from the east, directly towards you!"

A cold sweat broke out on my face as I skillfully loaded my CODEY single shot .22 caliber junior.

"Thadeus!" he screamed again. "You won't believe this, but two huge grizzlies are charging you from the west!"

I must confess my hair began to stand on end upon hearing this last exclamation.

Surely, one can understand my anxiety upon discovering that I had

but one round of ammunition and an Army and Navy jack-knife on my person.

Suddenly, the beasts were upon me. The bull was charging from my right, and the grizzlies from my left. My mind snapped like a whip.

With unbelievably fast reflex action, I hurled the knife into the air. Taking close aim, on the swirling, flashing steel, I waited for the precise moment to release the hammer on my powerful CODEY.

In an instant, the blade of the knife, slashing the flying slug into two separate hunks of cold metal. The individual pieces ripped into the brain of each grizzly, bringing each one to the same inevitable end.

I did not concern myself over the moose, for as everyone knows, you can shoot the bull any time.

ELECTRONICS CLUB MEETING

The Electronics Club held its first meeting September 17. The first topic to be discussed, jackets, brought many suggestions. It was proposed to have: a nylon shell only; blue cloth only; both nylon shell and blue cloth jackets; and blue cloth with no racing stripe and fewer crests. After much discussion the members voted, by a large margin, in favor of leaving the design as is.

A pamphlet is being prepared by the Club to give employers details of the training received by Electronics graduates. Employers with better knowledge of graduates' capabilities, will be able to place recruits in suitable positions. The cost of publishing will be carried by the Club.

The last item concerned the Club's work for the UCF this fall. The request of the UCF, that the Club continue this in the future, was accepted overwhelmingly by the members.

The only motion to pass without debate was the motion to adjourn. There were no dissenters.

THE SPORTS SCENE

CROSS COUNTRY RACES SOON

All those interested in competing in the upcoming cross country events whether it be for intramurals or WICC should be attending the nightly workouts being conducted by Mr. Sorenson.

If you are interested, Tuesdays and Thursdays at 5:20 should find you at the NAIT track huffing and hacking with the rest of the clan. However, Mondays, Wednesday and Fridays at 5:30 are reserved for a much more testing run at Kinsmen Park, where the real terrain of the C.C. ordeal can be experienced.

The first Intramural competition is to be held Oct. 12, followed, perhaps, by a contest in Camrose on Oct. 19. This Camrose meet is tentative at the moment but efforts are being made to finalize arrangements.

NAIT is, however, entered in the CAPHER tournament to be held Oct. the 19th. Based on the individual

showings by the members of the NAIT team in these competitions, the members of the WICC team will be selected. It is therefore essential that all who wish to make the school team compete in intramurals and the tournament competition.

The selected team will consist of 6 men and 5 women. The men run 3 1/2 miles while the women run a 2 1/2 mile relay, each girl running 1/2 mile. The WICC competition will start Oct. 26 and judging by the over 100 running at Kinsmen Park intramural sessions, NAIT stands a good chance of improving on her second place showing of last year. Once again all those interested in competing should contact Mr. Sorenson at the practices or in E-137.

NOTE: Persons wishing to manage either the mens or women cross country should see Mr. Sorenson immediately.

OOKPIK HOCKEY TEAM MEETING

On October 7, at 12:15 p.m. in the Little Theatre, the first general meeting of the Ookpiks Hockey Team will be held. The purpose of this meeting is to register all prospective hockey players as well as review some basic fundamentals of the game. It is imperative that all interested players attend the session. Mr. Cummings, this year's coach, also points out that it is advisable for prospective players, whether they be veterans or newcomers, to get in some pre-season conditioning. It might be a good idea, hockey players, to get out with the cross country crew and work on it every night, running while the weather is still appropriate.

Last year's team finished in top place winning 11 of their 12 regular season games. This season promises to be even more exciting than last, since about 30 games will be played by the Ookpiks making for more action for the fans and more games to be won by the team. Included in these 30 games will be 5 games with the U of A Golden Bears so the competition

is gonna be tough. Other new enemies have been added to the list of those to be trounced as Red Deer and the University of Calgary are now in the league. It all adds up to some pretty exciting hockey action and I will endeavour to keep you posted on the teams progress in the upcoming season, both home and away. For further information contact Mr. Cummings in Rm. E-137 or by grey phone, 436.

NOTE: Persons interested in becoming timers, scorekeepers, goal judges or managers of the team should see Mr. Cummings as well.

GIRLS!!!

BASKETBALL MEETING OCT. 3

The first meeting of the women's basketball team will take place Oct. 3 at 12:15. Mrs. Collister (your coach, girls) has not set the location of the meeting as yet but you may contact her in Rm. E-137. I'm afraid so far the girls showing in past years of basketball competition has been less than inspiring as exemplified by their last place finish last year but I have great confidence in the women of NAIT and I'm sure they will come back strong this season (I hope).

ATTENTION:

Letters-to-the-Editor, stories, ads., announcements, etc., for the next issue of the NUGGET should be dropped off at the NUGGET mailbox by OCT. 7.

Kingsway

JUST ACROSS THE WAY WHERE YOU RECEIVE THE BEST DOLLAR VALUE IN TOWN.

FRONTIER DAY

SATURDAY, OCTOBER 3

Saturday, October 5 at 10:00 AM-something new for NAIT-Frontier Day. This first annual event is the closest we've come to an intramural track meet. High jump, broad jump, relays, 50, 100, and 440 yard dashes are included in our meet.

MENS OOKPIK BASKETBALL TEAM NEEDS YOU!

The first organizational meeting of the Ookpik basketball team will be held Sept. 26, at 4:30 p.m. in the Bowling alley. It is important that all those interested in playing, scorekeeping, timing or managing be in attendance. By the way, scorekeepers and timers are paid at the rate of \$1.25 per hour which should be of some incentive.

Although last year's team finished a very strong second, it was still a second and I'm sure this year will be a little better. Anyone not able to make the above meeting should contact the coach, Mr. Strifler, as soon as possible either in room E 137 or by grey phone 436. Pre-season training sessions should also be attended by prospective players (see hockey). As practices start Oct. 9.

To prove who will be the top athletes, however, there are also going to be tough events such as three-legged races and wheel barrel races.

But perhaps the best novelty event is the egg throwing contest. This involves two persons who gradually separate. Upon each successive separation an egg must be thrown and caught by members of

a team. The winners are determined by the farthest distance between the two members of a team before the egg is dropped or smashed. It would be like fun. Come on out and give it a try.

Forms for each event can be obtained from room E 134. They must be filled out and handed in on or before Thursday, October 3.

ONCE AGAIN NAIT WILL HAVE CHEERLEADERS AT THE GAMES

Peggy Park, this year's women's sports chairman, informs me that NAIT is finally going to have cheerleaders again. Our institute has been lacking any sort of organization of this kind for the past two seasons, and whether this reflects on the spirit of the girls at NAIT or whether the blame lies on the shoulders of those higher up in the past is unknown to me at this time. Nevertheless it has finally happened and I'm sure you will agree that it will be a great boost to the teams, not to mention the fans during this coming season.

Girls interested in partaking of the cheerleading duties should contact Peggy Park in Rm. E-133

(if she's not there just put your name on a slip of paper and put it under the door). The functions of the girls will not be solely that of cheering our teams on; but will also include promotional activities undertaken by the institute as a whole or by individual technologies which require a bevy of well trained and attractive dancers. The troop will be instructed in dance routines by Bonnie McNeil now in 2nd year Bio. Sciences and in cheerleading by a girl from the U. of A. The whole idea sounds great and I hope you technology heads will keep the girls in mind for any promotional scheme you might come up with during the year (above board ideas that is).

NUGGET FUNNIES

"Aren't you the brave man who tried to save my son from drowning when he broke through the ice?"

"Yes'm."

"Well, what did you do with his mittens?"

"Mom, Dad's been hit by a car!"

"Don't make me laugh, Sheldon. You know my lips are chapped."

"Can I play in the sand box yet, Mommy?"

"Not until we find a better place to bury Daddy."

"Mrs. Brown, can Johnny come out and play ball?"

"But you children know he has no arms and legs."

"That's o.k. We want to use him for second base."

Sign over an Electric Chair:
YOU CAN BE SURE. IT'S WESTINGHOUSE!

"Your Grandma still sliding down the Banister?"

"We wound barbed wire around them."

"That stop her?"

"Nope, but it sure slows her up."

DICKY: "Is Rotterdam a swear word?"

RICKY: "Don't be stupid, no."

DICKY: "Good. My instructor fell in some Poison Ivey today, and I hope it will Rotterdam arm off."

TEACHER (warning her pupils against catching cold):

"I once had a little brother seven years old. One day he took his sled out into the snow. He caught pneumonia and three days later he died."

--Silence for ten seconds.

(Voice from the Rear): "Where's his sled?"
