## Government loans

Education Minister Robert Clark has announced that for 1971-72 he will be recommending to the Legislature an increase of six per cent in the full-time student grant to Alberta universities. The recommendation is within guidelines previously established for the province's Grade One to Twelve school system.

At the same time, the provincial government has requested the universities to hold Canadian and landed immigrant student fees at the same level as this year.

The university system revenue will, therefore, be approximately 2.6 per cent below the original grant increase recommended by the Universities Commission for 1971-72.

Pending the outcome of a detailed study of the need for increased enrolment in and the cost of graduate studies, the government has asked the Universities Commission to request the Universities of Alberta and Calgary to exercise caution and place some limitation on the number of new students accepted for graduate study, Mr. Clark said.

"The government realizes that the support being proposed for the universities, the elementary and secondary schools, and other post-secondary institutions is less than those institutions would wish. However, at a time when the government must meet many needs, including increased welfare costs, development of new job opportunities and improvement of the environment, all while avoiding inflation, the universities must share in the attainment of these goals by operating more efficiently," Mr. Clark said.

"As the Seventh Annual Review of the Economic Council of Canada has pointed out, governments are now spending as much on post-secondary institutions as on hospitals or the aged - and over the last 10 years, post-secondary expenditures have been increasing much more rapidly.

"In light of the findings of the Economic Council, that in spite of a steady increase in the capital of Canada's universities, they

have not significantly improved their output of graduates per teacher, I think Alberta's universities could profit from a harder look at their internal priorities.

"Last year at this time, in the course of announcing the government's level of support for the universities, I made it clear that the time had come for the institutions to perform some searching self-analysis in order to reduce waste and find more effective ways of carrying out their programs.

"Since that time, the universities have begun to re-examine their spending, and some economies have been made. We are convinced, however, that more work remains to be done in this area, perhaps in the area of the teaching load of some professors," Mr. Clark said.

The Minister made three additional announcements concerning government funding for the universities for the coming year: First, student registration in the Alberta universities for 1970-71, although higher than 1969-70, was below projections developed by the Universities Commission in consultation with the universities. The other western provinces have experienced a similar trend.

The consequent shortfall in university revenues, including fees and formula government grants, based on student numbers, exceeded \$4,000,000. As this shortfall was not anticipated on the basis of student applications, it was not known until after preliminary university registration figures became available in mid-October.

At this late a date the universities were unable to make sufficient expenditure reductions in the remaining five and a half months of the fiscal year to offset this large shortfall in revenue. The Government has therefore increased the 1970-71 per-student grant to the universities and the Banff School of Fine Arts to provide an additional government grant of \$1,925,000.

Second, last September, Cabinet met with representatives

of the universities and the Universities Commission to exchange views on university affairs. The major items of concern raised by the universities was the provision of formula operating grants based on actual student enrolment at December 10.

University representatives pointed out that if actual student enrolment exceeded the projects, the universities could not prudently spend the extra income late in the academic year to employ additional academic and support staff.

Conversely, if enrolments, and thus funds, fall moderately below projections, the universities could not proportionately reduce budgeted expenditure as staff had already been employed to provide for the projected enrolment. If the shortfall was large, the universities would be forced into a serious deficit situation.

As a consequence of this concern and on the basis of a strong recommendation by the Universities Commission, the government has agreed to provide support for 1971-72 on the basis of enrolment projections. If the actual enrolments in 1971-72 are above or below the projections, the 1972-73 projections will be adjusted accordingly. Cabinet proposes to hold a similar meeting with university representatives in the fall of 1971.

Third, in consultation with the Universities Commission, the government has arranged for the establishment of studies essential to effective long-term university planning. These include: provision for student transferability between Alberta's post-secondary education in Alberta; and provision of co-ordinated library computer services for Alberta's post-secondary system.

The studies, Mr. Clark said, were first proposed by the Universities Commission as a part of its desire to rationalize the Alberta universities systems and are in line with the recommendations of the Economic Council of Canada.

## Ignore it-maybe it will solve itself

Parking seems to be posing a problem here at NAIT. There appears to be ample parking area surrounding NAIT, but people still feel it necessary to park in every area which is designated "NO PARKING".

People at the present time are parking in all types of "NO PARKING" areas; such as; the middle of the road, in fire arteries, along driveways in loading zones and several others. They're even looking for new places to park. Next thing we know there will be parked; on sidewalks, in hallways, the main rotunda and even the skywalk. Yes, even the skywalks, but if you will look closely, you will see a no parking sign of a sort, but watch out for cars in the hallways and rotunda, there are no signs there yet.

People don't seem to understand that these areas are designated no parking for a reason. The roadways are posted to cut down accidents, fire arteries are posted for obvious reasons. Parking in many of the "NO PARK-

ING" areas can be dangerous. What if fire should break out or an accident happen, and the fire department or ambulance could not reach the proper area in a hurry because of cars in "NO PARKING" areas. Would you like to be held responsible?

Parking problems such as these are created by people who are too lazy or too illiterate to obey these signs. For you who are too lazy to park across the road, the exercise would do you good, (all that beer develops fat you know) or if you don't like the exercise you could try getting up earlier. Anyone with illiterate friends, please explain to them what the signs mean and why they are there.

The problem has become great enough that the administration is taking steps to combat it, one such step is to bring the city police on campus because we are a government institute, but this can be easily changed.

So keep up the good work and we'll be over run.

Most of us poor students are living on less than a person on welfare gets. One minute NAITSA is sympathizing with us and then they turn around and try to get more money out of us. The Fooseball and the Computer Quiz were bad enough, but when you replace a service that I have already paid for, with one I have to pay more for, I begin to wonder exactly how much money you want from me. Would you like the shirt off my back? You could probably get a dollar for it.

If you are 19 years of age or over, you can be concerned and vote at the nomination meeting for the Progressive Conservative Party, if you live in the Edmonton Centre Constituency—bordered basically from 97 St., to 117 St., and the river bank to 107 Ave. Why not come out to this political rally. You will also benefit by contributing to the aims of democracy. It should be a grand soiree. Starts at 8 p.m. Get there early and cast your vote for the man you think will best represent the Edmonton Centre Constituency. NOTE: date change—March 2, 1971.

Keep the following dates in mind, March 28th through to the 4th of April. I spoke to Bill McCallum the driving force behind the NAIT Curling Club. He mentioned that the club is going to sponsor a bonspiel, indicated dates. The entry is to be \$24.00 per rink, with three games guaranteed. There will be a limit of thirty-two rinks. The \$24.00 will also include a banquet. Perhaps the most exciting thing about the bonspiel is the fact that there will be a total purse of \$800.00.

...I am five foot two eyes of blue, my first name is Dianne. I have blonde hair and a scratch on my right wrist. Who am I??

...Student Counselling is sponsoring a six week series concerning education for marriage. The series will include such subjects as, law, money, physical, emotional, spiritual, and your marriage. For more information drop down to E121.

...The last few weeks have brought the political scene to NAIT, in the name of Jerry Spevakow (BAS). It seems that Jerry is very intent in keeping this great country of ours, in our control. Damn good idea this is, but the practicality of it seems to escape me at this time. It seems to be a huge task that faces the Canadian people at this time. Whether the Canadian people are willing to part with their money to indeed buy back the Canada in which they live, is subject to discourse.

## Letters to the Editor

"Apathy" is a neat catchphrase, a fifty-cent word that sounds impressive, covers lots of territory, and contributes very little toward understanding the real situation. Speaking for myself, I am in a tough course, on a tight budget. I can't afford to spend money on entertainment. There are plenty of other students in the same predicament.

Every technology, during the course of the year, puts on a number of social functions. The idea of these is

- (1) To have a good time, and
- (2) To make money.

Concerning no. (2):

Ques: Where does the surplus money come from?

Ans: From the students who attend, mostly from other technologies, ...But all the other technologies are trying to make money the same way. Like the two men sitting in the middle of a desert, selling rocks to each other and both of them getting rich...

There is something in this idea that doesn't add up.

We are in an economic recession; money is short, many of us have little to spare; the prospects of summer jobs look pretty grim. Social functions are consistently going in the hole, and we, the students, are chided for failing to attend them from sheer "apathy".

I suspect that a good deal of this "apathy" is simply due to red ink in the ledgers.

Money isn't necessarily the whole problem, or even a major part of it. There are plenty of other reasons, but thinking in cliches will not tell us what they are.

If your technology is planning some functions, don't depend on formulas that were successful two years ago; things may have changed since then. Instead, examine this year's successes, try to find the elements that made them successful, and consider these elements in your plans. People are willing to spend money on some things. What are they?

By Chris Braid  
Instrumentation.

With six color T.V.'s costing about \$500.00 each, why in hell can't we watch the hockey game on Wednesday nights?

Some big wheel gave us some cock and bull story about rules and commercial on the T.V. and how his students need the practice on how to run a T.V. program.

Granted if it's like the other technologies at NAIT they do need the practice but surely to god one night a week is not going to kill them. What the hell's the matter with having the network's own commercials on, everybody else watches them why should we at NAIT be privileged as to watch our own private commercials. Surely there are others besides the group that already complained, that would like to see something on the TV besides the garbage that is shown. I, for one, don't buy establishment rules and this fellow sounds like he owns the whole damned place and what he says goes and that's horseshit Elmer!

Herb Fehr

Recently a big quarrel was held with some guy who is apparently head of RTA. The quarrel was over the fact that RTA refused to televise the Wednesday night hockey game. The instructor of RTA said he would not televise the game because his students needed the practice of acting out like they were running the TV programs and CBC was the only channel good enough for this. Fine, but why not do this during the day. There are six TV's in this school and they sit idle all day with nothing but stupid memos going around and round all day. Then about 5:30 they start televising. Why couldn't they do their practice during the day thus permitting good programs to be shown in the evening when people are interested in watching. My point is that I feel the Wednesday night hockey game could be televised as I feel many people are interested in viewing it as was illustrated by the turnout

to argue with this big-wig instructor. If it cannot be shown on all TV's I see no reason why at least one TV can't be tuned in to the hockey game. No wonder a TV was stolen from the institute. Somebody finally realized the TV should be put to good use and decided to take it home. If RTA continues to show junk all day it wouldn't surprise me to see more TV's stolen.

Come on all you hockey fans let's have your views and let's get Wednesday night hockey games shown in NAIT, after all it is our national sport.  
A TRUE CANADIAN HOCKEY FAN

### STUDENT PARKING

I would like to point out something that has been a concern of students at NAIT ever since its doors have been open to the public. I have asked some of the students for their opinions on the parking spaces at NAIT and if parking facilities could be improved.

### IF SO HOW?

"It's lousy, because there is a lot of open space around NAIT that could be used for the improvement of parking spaces for the students."

"Not very good, they could make a parkade to supply all the students with parking spots."

"It stinks, because come spring where will all the students park who are parking on the other side of the street, due to the fact that the ground will be too soft for any students to park there without getting stuck."

"It's a hassle, because there is a lot of open space near the building that could be used for parking spots."

"It's lousy, move the STAFF

parking lot."

If nothing can be done about the parking spots, what could be done for safer crossing of PRINCESS ELIZABETH AVENUE to the NAIT grounds?

"Have a marked crosswalk with flashing lights and should be enforced by the law."

"Make a skywalk as not to hinder traffic."

"Traffic lights should be put up before someone gets hurt."

"Make an underground passage."

I personally think something should be done.

D.J. Chouinard

2. Howard Waye (7)
3. Bill Medak (4)
4. Levi Dronyk (4)
5. Brent Holman (4)

Game summary and hi-lites:

A very exciting game was played on Wednesday, February 17th against the RTA technology. The aggressive males overcame the fragile and feminine women's team to come out on top. Using their weight and speed, they out played the Ookpikettes. They also used tactics that made the women's team giggle throughout the game--this made the Ookpikettes too weak to do much. Howard Waye outshone all players because of the bright orange shoes he wore. Both teams seems to have an enjoyable time playing the game.

### MEN'S INTRAMURALS

Many sports have been completed or are still in progress. The battle for first place is still a tough one and anyone could take it. Exploration is on top now but last years winners, Computer Systems are not going to give up easy. In fact any of the top five technologies could end up in first place. The staff this year has entered a team and they are showing the students they can compete with the best of them. Right now they are in fifth place but as they are staff they cannot compete in any play-offs or for the trophy. It is good to see that some instructors are taking an interest in student activities and these business education instructors deserve congratulations.

Basketball finals are now in progress and the teams are all fairly good, making a good race for the final position.

Hockey has started and the hockey players compete in NAIT's Hockey Night in Edmonton, Tuesdays and Thursdays. Many of these games are quite interesting with many teams giving their star players nicknames that in some cases are better off not mentioned. The sports are coming to a close and it won't be long until the champions are found. The sports that have been completed with the standings up are as follows:

Flag Football .....	Computer Systems
Cross Country .....	Architectural
Golf .....	Computer Systems
Continental Handball .....	Business Administration
Badminton .....	Architectural
Soccer .....	Exploration

The point standings as of February 16, 1971 are as follows:

Exploration .....	657
Computer Systems .....	627
Instrumentation .....	543
Gas .....	529
Business Education Staff .....	423
Architectural .....	352
Drafting .....	341
Banking .....	308
Marketing .....	297
Business Administration .....	251
Social Services .....	182
Electronics .....	173
Plastics .....	163
Building Construction .....	162
Air Conditioning .....	145
Forestry .....	145
Telecommunications .....	135
Biological Sciences .....	128
Medical X-Ray .....	103
Industrial Production .....	98
Survey .....	86
Chemical .....	32
Heavy Duty Equipment .....	29
Civil .....	13
Radio and TV Arts .....	64
Materials .....	116
Industrial Electrical .....	138

## Women's Intramurals

This year in Women's Intramurals there has seemed to be more interest in the technologies. Only four sports have been completed so far this year but at least some girls are showing an interest. This year the girls are participating in rather unusual sports for females. They started their competition with FLAG FOOTBALL and next week FLOOR HOCKEY!!! is starting. Let's hope they aren't as rough as the men in this sport. A real rivalry has occurred between CHEMICAL, COMPUTER SYSTEMS and SECRETARIAL as they have been the only technologies represented in the past few weeks. The sports that have already been completed are:

Flag Football .....	Chemical
Volleyball .....	Secretarial
Basketball .....	Chemical
Badminton .....	Not Posted
The point standings as of February 16, 1971 are as follows:	
Chemical .....	237
Computer Systems .....	191
Secretarial .....	183
Banking .....	105
Dietary .....	55
Social Services .....	35

## Nait boys win bonspeil

A curling team made up of our NAIT, students, all from Plamondon, Alta. participated in their local annual bonspeil. Thirty-eight other rinks were entered coming from Edmonton, MacMurray, Lac La Biche and other towns in the area.

A magnificent performance by the NAIT team gave them first prize in the B event.

The competition which started on Friday, February 12 and ended on Sunday, February 14 saw skip Ken Belanger of Banking and Finance, Louie La France of Barbering playing third, Vernon Plamondon of Civil Engineering playing second and Ronald Cote of Surveying playing lead; win 5 out of 6 games.

A high standard of curling and good sportsmanship were the team's motto as curling was promoted on an around-the-clock basis. The hectic weekend for the NAIT team climaxed in a prize-giving ceremony which took place by Ken Belanger rink. For winning the competition the team received the Bon-

spiel Curling trophy for one year, individual trophies, and other valuable prizes ranging from \$40 and up.

The trophies were presented by the President of the Curling Club as the town's enthusiastic population looked on.

## Inter-tech Curling

On the weekend of February 5, 6 and 7, NAIT was represented in Saskatoon by two curling teams, mens and mixed. Also present at the competition were Vermilion, Saskatoon, Moose Jaw and The Pas, Manitoba.

The mens rink, skipped by Colin Hegerat did poorly winning one of the four games. NAIT went down to defeat in close games to The Pas, Moose Jaw & Saskatoon; defeating Vermilion.

The mixed team, skipped by

## Wrestling

This year's Junior Varsity Tournament was quite a challenging one, in which NAIT placed 3rd in the competition, held at the University of Alberta. Success was achieved by way of six wrestlers. Three of the six wrestlers placed second.

They include:

Brian Marcus of 142 lbs. class  
Victor Michalcuk of the 158 lbs. class  
Ivan Gramlich of the 150 lbs. class  
Gene Chromik wrestled well, placing 3rd in 158 lbs.

Coach M. Speers comments that "the Ookpiks have a very good chance of retaining the cup which they won last year."

Soccer

The Ookpiks drew 2-2 against the Internomads on Monday at Kinsmen Field House.

## Basketball

The women's team played a good match week, of which they won. On Monday, February 8, the industrious Ookpikettes won their match against the Marlyn Jets on a 42-47 point aggregate. Sylvia Moroz played an outstanding game on offense as she scored 27 points. The other scorers included Alicia Maluta who scored 5 points, Barbara Patrick scoring 4 and Pat Mackie scoring 4 points. Mrs. Collister, the coach, comments that, "the team placed well in the city league."

On Tuesday, the Ookpiks played a very challenging match against the YMCA. The inaccuracy of scoring, gave the Ookpiks the worst band. They lost 88-66 to the "Young Men".

Wayne Stevens did slightly better winning two and losing two. They defeated The Pas and Moose Jaw and were beaten by Saskatoon and Moose Jaw, who had two mixed rinks.

All in all it was a good weekend, with BOOTS being the word for the weekend but the highlight of the weekend was JERKY.

Better luck at the next meet, curlers!

Bonnie &amp; Delaney in Concert at the Field House

## Rock Scene

By Gregg Elock

Bonnie & Delaney and Friends, here on Sunday, Jan. 31, put on probably one of the best concerts I have seen here in Edmonton. They literally had the whole audience entranced by the music, showmanship. Their fantastic band gave them the backing they deserve. More of the singers should take more of this and bring in their own backing for their numbers.

They also brought in their own sound system and it was a good one. They also were recording live so this will give you an idea of the system.

The only let down on the whole show was the group who played before B & D they were called "Canada" and most of the audience was quite bored with their music. In fact, the smell of burning grass, which was quite prevalent during B & D, was absent during Canada. Their music was reasonable and considering the age of the group, they will probably get better as they play together.

If you really enjoyed B & D you can hear a lot of their songs from the show in their album "To Bonnie from Delaney", which is soon to be followed by two more, some of which was re-

corded at the field house.

For those of you who remember, the TV Show Rock 2, the band that backed them on the TV show was the same as here it included one of the best piano-organ, sax played around. Another Alto sax player, who was great, a trumpet player, and drummer, a congo's drummer, two upright floor drums, a lead guitar, bass, and Delaney who plays rhythm for the band, they all were definitely professional musicians, one and all.

They did numbers like "Soul Shake", one of the bigger hits, "God Knows I Love You". They call it Rock and Roll Music. Alone Together, Living on the Open Road. They did all their songs with professional showmanship and ability. Their style goes from heavy rock through blues to soul music.

Bonnie and Delaney played for 2 hours and to about 2,000 people and I think every one would have stayed another 2 hours if they could have stayed. They were well received by the audience and the ovation they received at the end they deserved.

Bonnie and Delaney came with friends and I'm sure they left with a few more.

## Cooking

Some students want to spend time studying rather than have to fix a meal, so they usually grab a sandwich or an apple to eat. Here is another short snack to add amongst them. If you think grilled cheese is good, wait till

you taste this.

Toastwich  
2 oz. luncheon meat, or flaked tuna or salmon  
2 tblsp. grated cheese  
2 tsp. Mayonnaise  
2 tsp. chopped pickle  
1/2 tsp. onion  
1 egg  
2 tblsp. milk  
2 slices of bread  
Shred meat into bowl and add cheese, mayonnaise and onion. Mix well. Spread bread lightly with mustard. Spoon mixture on one slice of bread. Cover with remaining slice. Blend milk and egg. Dip sandwich in egg-milk mixture. Both sides. Place on cookie sheet and broil for 5 to 7 minutes. Serves one.  
Cinnamon Fantans.  
2 c. flour  
3 tblsp. sugar  
4 tsp. Baking Powder  
1/2 tsp. cream of tartar  
1/2 c. shortening  
2/3 c. milk  
2 tblsp. melted butter  
1/4 c. sugar  
1 tblsp. cinnamon

Into a bowl mix all dry ingredients. Stir well to blend. Cut in shortening with pastry blender or fork until mixture resembles coarse crumbs. Add milk. Stir with fork until all dry ingredients are moistened.

Turn mixture out on lightly floured board. Knead gently 20 times. Roll dough into a team by twelve inch rectangle. Brush with melted butter. Combine sugar and cinnamon together, then sprinkle mixture on dough. Cut lengthwise into 5 strips. Stack strips. Then cut it into 12 one inch pieces. Place cut side down in well greased muffin tin. Bake at 424°F for 15 to 18 minutes. Makes 1 dozen.

## Canada

### Manpower Center Student Placement Office

The Student Placement Office is a Canada Manpower Centre on campus of the Northern Alberta Institute of Technology. Its function is to provide facilities and schedules of employment interviews for the placement of graduate students in rewarding and satisfactory employment.

It is our purpose during Open House this year to re-emphasize for industrial and professional organizations the quality of the graduate students, their usefulness in the technical and business field, and the immediate availability on graduation of many well trained and capable students. To accomplish this purpose, we will welcome enquiries at any time and will make information available on the labour market generally and on any specific matters, such as average of wages for graduate students and the numbers who will be available for employment on graduation. We would like the opportunity to discuss your personnel problems with you and can, if you wish, provide the opportunity for you to see the student at first hand during his training and to contact senior instructors and other institute personnel so that you may have full information available to you in meeting your labour requirements.

Industry has become increasingly aware that we have many undergraduates available for summer employment, and that these students, having had a year of training in their technology, can be most usefully employed.

We extend an invitation to Business and Industry to communicate with us for assistance in filling your summer personnel needs. As with the graduate student, we can make facilities available and set up a schedule of employment interviews.

For the student, we provide guidance and counselling to assist you in reaching career decisions, and the opportunity to meet employers and to make employer contacts, and to be able, at first hand, to assess the potential of the employment that is offered. We provide a library of reading material to assist you in career planning and we also have a number of brochures from all of the larger industries who visit the campus.

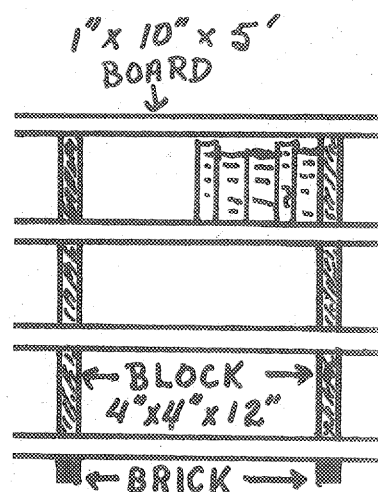

All enquiries should be directed to Mr. Norman McLeod or Mr. Bob Richenberg at the Student Placement Office, Room E132, at the Northern Alberta Institute of Technology. The telephone numbers are 474-7371 and 479-6256.

## Hobby Corner

A BOOKCASE THAT ANYONE CAN BUILD

-by Gordon Krassman  
-Forestry Tech.

Once you have the required material you can build this bookcase in just a few minutes. The cost is very low-around \$6.00. The case can be taken apart and moved easily.

TOOLS: NONE NEEDED UNLESS YOU WANT TO PAINT IT  
MATERIALS:

4 pieces of board 1 inch thick, 10 inches wide, and 5 feet long. Spruce is a very good wood to use.

6 cement blocks (floral) 4 inches by 4 inches by 12 inches.  
2 Bricks (beige Rugtex)

Cost:

Wood \$2.50

Bricks .34

Blocks 3.30

Total cost \$6.14

If you want, you can paint this bookcase.

# Series on fashion

—by Debbi

We have a fashion consultant visiting us at NAIT every Tuesday night to "clue us in" on some ideas that we have always wondered about. The series, consisting of five lectures, covers topics that every young woman becomes personally involved with. These lectures attempt to teach us pointers on makeup and personal grooming, preparation for a young lady's wedding day, party, and job interview. With such an experienced spokesman in this field, we definitely will have some questions answered. Who is she?

Kathleyn Whilton, a former model, was born in Fort Saskatchewan. She was formerly a fashion co-ordinator for Eatons, but is now owner and manager of the Third Face Boutique. However, she has made a few comebacks in arranging a number of fashion shows for Eatons. Miss Whilton has made a number of appearances of television as she is a student of astrology and numerology.

Have you ever heard of a science, namely astrology, connected with a fashion business? Kathleyn Whilton uses her interest in astrology as a basis for aiding customers in their choices of clothes and accessories. It sounds unusual to do business in this way, but that's what makes it so interesting and unique. A young lady's personality plays an immense part in her taste of clothes. By connecting the astrological sign with a style of dress, Miss Whilton can more or less assume what that individual's taste is. At the first lecture, she illustrated the coinciding of a particular sun sign with a certain style of dress. An individual whose birthday falls under the sign of Sagittarius is usually sports-minded or athletic. They choose a simple cut in dresswear and are not elaborate in a number of things they do.

Don't you prefer buying what appeals to you? Think about it.

How about considering if you would like to attend these lectures? It's too late for interested parties to register for these talks now, but you have another chance. Another set of series will be starting on March 23. For two dollars you can clear up a lot of doubts. So, why not go see Mrs. D. in E134 and leave your name.

If you want to know more about these series stay with the Nugget and read about them.

It's You!

The first lecture began last Tuesday, February 9, where Miss Whilton spoke on bridal arrangements.

The wedding day is an extension of the young lady, herself. The whole arrangement including the theme, wedding party and ceremony, is chosen by the future bride because she wants it this way. Traditional ideas are nice to follow to a certain extent but only if the bride wishes to.

To get her dream the way she wants it to be, the young bride has to plan it all out. This usually starts 10 to 6 months before the wedding.

**BUDGET:** Your wedding plans but do not prevent yourself from having what you want. Discuss the expenses over with your parents and fiancé.

**SELECT** the style (kind of wedding) and site for ceremony and reception.

The Theme and Wedding Invitation **DECIDE** on whom should be in the wedding party and ask them: -on dresswear

-on what kind of meal and perhaps plan a menu with selected cater-

About 3 to 1 month before the wedding, final preparations can be done, all all is in readiness for the big day.

**RESERVATION:**

Reserve the hall or place where the ceremony and reception will be.

Reserve your photographers, caterers.

About a few weeks before:

Place the order with the florists for your bouquets, boutonnieres and corsages, floral arrangements.

Make appointments with the hairdresser and doctor.

Take care of all last minute details.

Of course, the lecture was more detailed than this, but a person has to attend to really learn all what they want to know. Indeed, there is an awful lot of planning and preparation for the wedding day but when it comes, a girl

can honestly say, "it was worth it!"

**PARTY-TIME:**

The second lecture was held Tuesday night, February 16, when Miss Whilton spoke on entertaining.

What is its purpose?

You are entertaining either for pleasure or for business reasons. This in effect, is your whole motive for having a party.

If it is for business reasons, make sure it is done in a relaxed atmosphere. Women can easily create such an atmosphere because they immediately feel at home.

If it is for pleasure and having fun with a few friends, make sure the party is always alive. This is done so by dancing, playing a number of games, or just talking.

There can be two kinds of parties: a conversational party or an action party. Either party should have listeners and conversationalists.

To plan a party, a person has to take a number of aspects into consideration:

1. Amount of Space:

Is there sufficient freedom to move around near the food and throughout the room?

The number of people the area will hold comfortably.

This decides as to what kind of party, an active one or rather settled down kind.

2. Atmosphere:

If you are having several friends over or just one or two people decide if you would like

to have it informal or formal. Buffet style: This is very informal and quite friendly for a large gathering.

Sit-down style: This includes 4 or more and is usually rather formal.

Your lights play a very important part in creating the atmosphere of the party. They tend to place the guests in a certain type of mood.

3. Planning Your Food:

Serving interesting foods by serving them in unusual ways, displaying them in different arrangements or trying out new kinds.

eg. Serve a variety in breads or cheeses. In a buffet style, fresh vegetables and fresh fruit is good. A sit-down dinner should all be planned out and centered around one dish.

Hints:

Serve tasty food to cut down on the liquor.

Let your food compliment your drinks.

eg. If beer is served---beans.

There should be a ruggedness connecting the drinks with the food.

4. Introductions:

Let the guests mingle. You could break the mood if you start introducing everyone around.

Hint-

When introducing start from most important to less.

You have an obligation to your guests as well as to yourself, so never leave the party to do dishes or something. The host-

ess must take care of the guest's needs. The guest has an obligation, also. They shouldn't get up and help clear things away.

There are so many details that should be considered in planning a party, that I could write on and on. A number of others were mentioned at the lecture.

Enjoy yourself as well as your company.

## The man from A.P.A.T.H.Y.

If anyone has seen the man from A.P.A.T.H.Y. or know of his whereabouts, please let us know.

"Are these girls apathetic. It sure doesn't look that way."

THE SUCCESS  
OR FAILURE  
OF THIS  
OPEN HOUSE  
IS  
ENTIRELY  
UP TO...  
**YOU!!**
