

2014 National Rendezvous

Camp Emergency Policy

Several Emergency Alert Systems (EAS) have been installed around the camp. In the event of a camp emergency, such as a severe thunderstorm, tornado, or fire, the EAS will be activated. The EAS will sound a siren and broadcast a voice announcement stating the nature of the emergency and any additional information or instructions.

In the event of severe thunderstorm or a tornado, please take the following actions:

- Try to get inside the lower floor of a building or small protected space that has no windows.
- If a building or protected space is not available, lie in a ditch, ravine, culvert or other low lying area, which is not prone to flooding.
- Use your arms or a piece of clothing to protect your head and neck.
- Stay away from trees as they are more easily hit by lightning.
- Do not seek shelter under a tent or food pavilion.

In the event of a non-weather emergency, please follow the instructions that are broadcast over the EAS.

Once the emergency is over an "All Clear" message with any additional information or instructions will be broadcast over the EAS.
