Compiled and Edited by  
**ALAN GELL**

PATCHES (First Edition), published July 1976, EDITED BY Alan E. Gell

ROYAL RANGER PATCHES (Second Edition), published July 1978, EDITED BY Alan E. Gell

This is our second attempt, building on the first, to list the many patches that have been utilized in the Royal Rangers program and ministry to commemorate a special event. With the special help of Dade Massey and Butch Kiefer, we started this very involved process. Many Royal Ranger Commanders, leaders, pastors, and other men have helped us this time by sending us information to update and keep us abreast of the latest issues. Unfortunately, not everyone does this, so we know that this booklet is incomplete. If you have information to fill in some blank spaces, please send it to us, or a drawing, a sample patch, or anything that will help to make this book more complete.

We wish to thank all of you who responded to our letters and inquiries in the preparation of this edition. Without your help the job could not have been accomplished. We would also like to thank those of you who have listed your "estimated swap value", because we have used these to tabulate the "swap value" listed in this booklet (see below).

TRADING VALUE--SWAP VALUE

IMPORTANT--PLEASE READ-- The "worth" of a particular patch is determined only by the persons that would like to have that patch. This "worth" cannot be set or determined by anyone else.

Many persons have responded just prior to the printing of this edition & have given their own personal guess as to a "swap value". We have taken all the values received and "averaged" them to obtain the "swap value" listed in this booklet. It is to be utilized only as a "starting point" of reference, primarily for beginners in patch collecting. Do not take the "swap value" in this booklet as a set, absolute figure. USE SOME "HORSE-SENSE". The "value" is determined by many things---- among them being the quantity made, attractiveness, colors, design, number of people wanting the patch, etc, etc.

If you believe that the "swap value" listed in this booklet is entirely unjustified, please write and explain the basis for your opinion, and please give us your estimate in time to be averaged and included in the next edition.
