

UR

BRELYON x zmicro

EXPERIENCE ULTRA REALITY

The world's first headset-free virtual display

BRELYON × zmicro

Large-format, ultra-immersive, high-performance display in a compact form factor.

Brelyon's Ultra Reality (UR) display technology provides an advanced solution that fully disrupts the VR/PC monitor paradigm. Brelyon's UR display provides immersion with a wide field of view, but does not require the user to wear any headgear. The UR display can replace an array of up to six tiled 32" monitors at the same working depth.

FIELD OF VIEW

100+° field of view enables an unparalleled immersive experience.

IMAGE QUALITY

4K resolution and high frame rate means clearer, crisper images.

SCREEN SIZE

Perceived screen size of ten feet creates abundant, seamless visual real estate.
