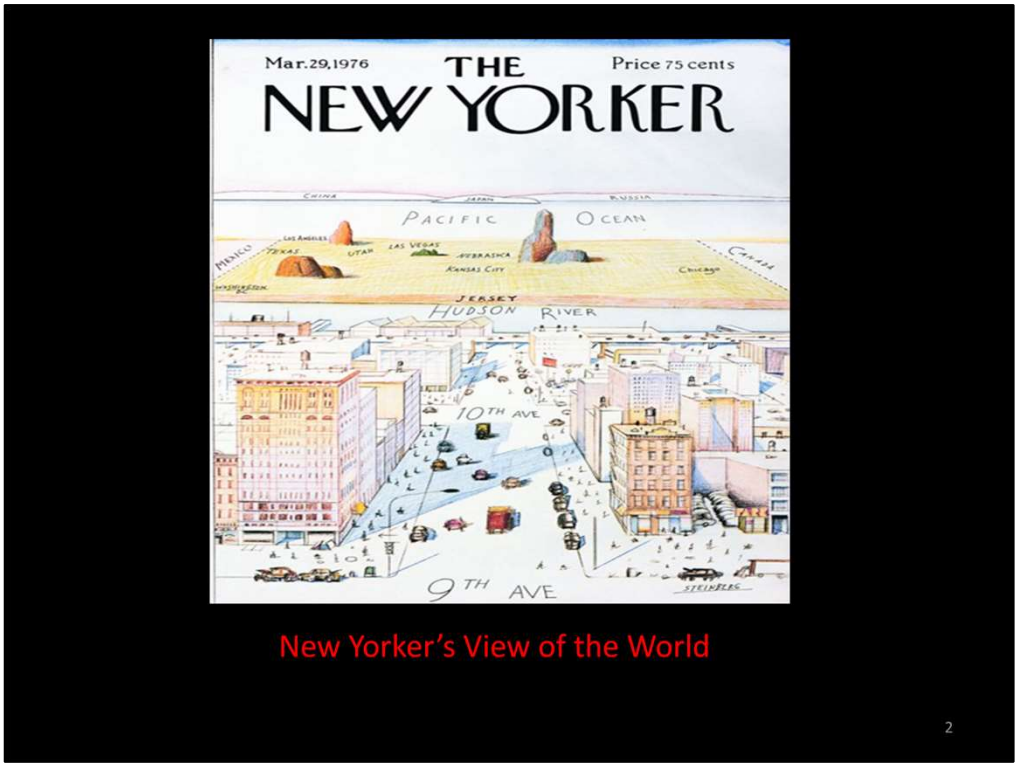
"Human life is reduced to real suffering, to hell, only when two ages, two cultures and religions overlap… There are times when a whole generation is caught in this way between two ages, two modes of life, with the consequence that it loses all power to understand itself and has no standard, no security, no simple acquiescence.

--Hermann Hesse, Steppenwolf
Between Two Ages, Z. Brezezinski



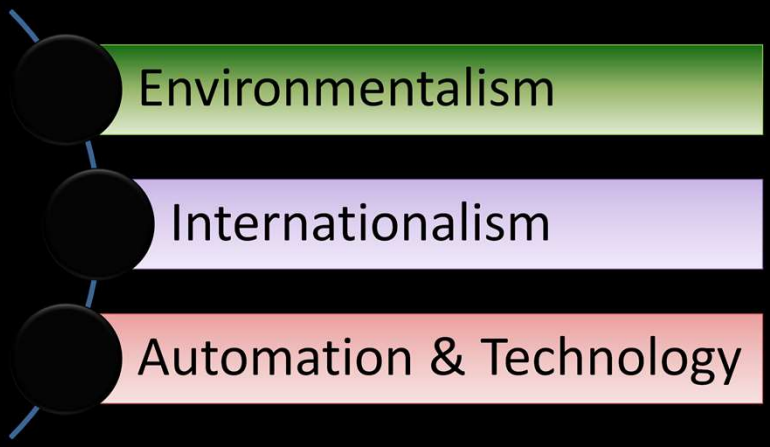
New Yorker's View of the World

We understand the world in the context of our experience.

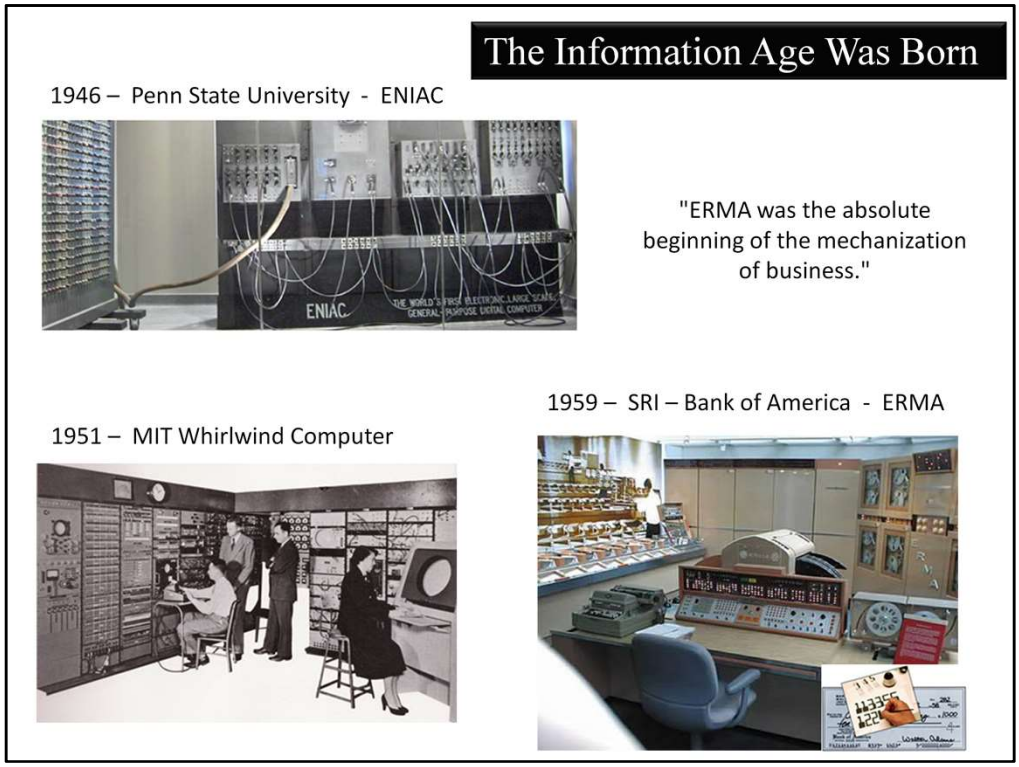
When words are spoken or written, we apply our context. That creates a gap of understanding between what was said and what we heard.

Exploitation and deception occur in the gap.

Drivers of History



3



1946 – Penn State University - ENIAC
Constructed and operated at the Moore School of Electrical Engineering to solve mathematical problems.

ENIAC - Electronic Numerical Integrator and Computer
Constructed and operated at the Moore School of Electrical Engineering.

1951 – MIT Whirlwind Computer
First with core memory and graphics - adopted by the U.S. Air Force for use in the SAGE (Semi-Automatic Ground Environment) air defense system, which became operational in 1958 with more advanced display capabilities.

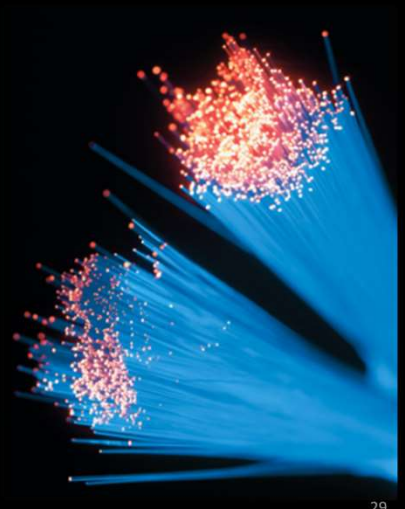
The World At The Speed of Light

1991 The Internet

The good news from Washington is that every single person in Congress supports the concept of an information superhighway.

The bad news is that no one has any idea what that means."

--Cong. Edward J. Markey



29

High Performance Computing Act of 1991

Reinvention of Government

The people demand and deserve an active government on their side. But they don't want a government that wastes money, a government that costs more and does less. They voted for change. They wanted a literal revolution in the way government operates, and now, you and I must deliver.

President Bill Clinton
Remarks to the Cabinet
February 10, 1993

Today, the President has asked Vice-President Gore to lead a revolution in Washington that will change the way government does business. The American people deserve a government that treats them like customers.....

Do More With Less

"High Performance" Government

Corporate efficiency implemented through information management systems & police state surveillance

Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA)

International Highway System

"The mission of the IVHS community in the U.S. - composed of all levels of government; ***the automotive, electronic, communications, and information industries; and academia*** *- is first, to improve surface transportation by deploying IVHS technology broadly throughout the nation and,* ***in cooperation with Mexico and Canada****, throughout North America, and second, to develop a U.S.-based IVHS industry to provide technology in the U.S. and abroad."* 1992 – IVHS Strategic Plan

37

Corridor system

Redefined Interstate Highway system – became National Highway System

Includes

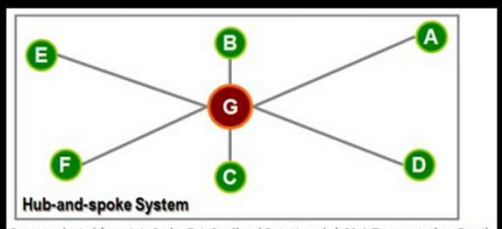
`The purpose of the National Highway System is to provide an interconnected system of **principal arterial routes which will serve major population centers, international border crossings, ports, airports, public transportation facilities, and other intermodal transportation facilities and other major travel destinations; meet national defense requirements; and serve interstate and interregional travel**

Intermodalism

Definitions:

Intermodal - the connection point between two modes of transportation for the same trip

Intermodalism - A system designed around the concept of intermodal efficiency for all modes of transportation - truck, train, air, ship, bus, vehicle, etc.



Hub-and-spoke System

Source: adapted from J.J. Coyle, E.J. Bardi and R.A. Novack (1994) *Transportation*, Fourth Edition, New York: West Publishing Company, p. 402.

38

Hub and spoke System pioneered by Delta for their airline routes – but also became transportation plan for our cities

Hub and spoke design is also the design for networks
