SUMMARY

I am a technical professional whose passions lie in coding, crypto, and startups. My prior experience includes writing software, developing websites, and project managing teams of people. Through my startup endeavors, I have learned to "wear all the hats" - Everything from automating software stack deployments, to rolling out an ERP. Such activities saved my prior company hundreds of hours of labor. I am actively seeking opportunities that require entrepreneurial thinking and software development.

SKILLS

Technical Project Management: Jira, Confluence, Trello, Microsoft Office, Airtable, Odoo, Slack, Zapier, Google suite
Systems Administration: Linux (Ubuntu, CentOS, Raspbian, Kali), Shell scripts, Microsoft Azure, Wireshark, Python
Code: JavaScript, HTML/CSS, Python.

PROJECTS

Personal Website | https://itsliam.com

- Leverage project management methodologies / SDLC to ensure finished product meets client needs
- Tech: Adobe Audition, Premiere, Audacity, Microsoft Office, VScode, nodejs, powershell

EXPERIENCE

Startup team member
Actionstreamer | Cincinnati, Ohio   Dec 2019 - Nov 2020
- Flexed into many roles, including project management, software development, and manufacturing
- Constructed standard operating procedure for laboratory, implemented ERP for inventory (Odoo)
- Worked with clients to understand requirements, and devise deliverables

EDUCATION

Technical Project Management Immersion   Nov 20 - Feb 21
Thinkful
- Actively learned and applied software development lifecycles, effective remote communication, and the ideal tools and techniques to manage teams.
- Created project deliverables, including project charters, communication management plans, requirements change management, and budgeting spreadsheets.
- Engaged with the Agile mindset and leveraged venture design process.

Cybersecurity   Aug 16 – Dec 19
University of Cincinnati
- Participated in hackathons, extracurriculars, and student leadership positions.
- Acted as a summer researcher for two summers, completing IT and software work for the applied mathematics laboratory.
- Gained insight into systems administration best practices, and subsequently worked on automating web server deployments.
